EXECUTIVE SUMMARY

The Co-operative has performed well in optimising the use of shareholders' funds between 2017-18 due to high ROE and there is an improvement of productivity in the use of its assets and resources to generate a positive return. Costs have moved slightly slower than its topline and its current asset position relative to its current liability is favourable.

Revenue has increased significantly over the period by 21.3% compared to the previous year. This is motivated by the expansion of assets within the entity, with an increase of asset base by 53.6%.

Despite a moderate increase in its overall expenses, the profit before tax growth increases significantly by 48.3% in 2018. The profit margin after tax has performed marginally at 1.1%, with an increase in performance noted by 22.3%. The growth in its profit margin after tax as compared to previous year, it has increased slightly by 0.2%.

With the active expansion of assets, the total liabilities groves faster than its equity and this signals an increase exposure to short-term creditors financing to support its asset base.

From a public sentiment perspective, the Co-operative faced a somewhat volatile trend with the current COVID-19 pandemic situation that disrupts the entire business and industry outlook and changes the way how Co-operative works.

Negative News

Events that generated negative sentiments resulting in the Co-operative industry.

- 1. The Malaysian Cooperative Commission (CKM) has received complaints from the number that the Koperasi Samudra Malaysia Berhad po-operative has carried out deposit collection activities by offering high returns every month. This scheme did not get approval from SKM under Sections 50E and 52A of the Cooperatives Act 1993 where cooperatives are not alloyed to take deposits and issue loans without the Commission's permission.
- Over 400 out of the 600 credit cooperatives nation idea that are registered under the Cooperative Commission of Malaysia (SKM) have been affected by the COVID-19 pandemic since March. The cooperatives' incomes were affected during the six months as borrowers did not repay their instalments.
- Local credit cooperatives are accused of facing the risk of bankruptcy due to the restriction of personal loan repayments due to financial institutions and development financial institutions not providing moratorium services for that purpose.

Positive News

On the other hand, some events that had given positive sentiments to the Co-operative industry included:

- The Sabah Government Employees Cooperative Society Berhad (Kopeks) assures its members that the cooperative's businesses are running as usual with the main focus on returning the fees and shares of retired members as well as clearing external and bank debts.
- The Ministry of Entrepreneur and Cooperative Development (MEDAC) will launch the Malaysian Cooperative Transformation Plan 2021-2025 (TransKoM), aimed to ensure entrepreneurship remains a major contributor in driving the country's economic growth.
- 3. Cooperatives nationwide are offered a loan repayment moratorium through the Revolving Capital Fund (TMP-JPK) under the auspices of the Malaysian Cooperative Commission (SKM). The deferral repayment is offered for a period of six months, from April to next September, with an estimated total allocation cost of RM99 million.
- The local operations movement has suggested four solutions to make the People's Concerned Economic Stimulus Package (Prihatin) more effective and comprehensive by taking into account the welfare aspects of more than 14,417 cooperatives nationwide.

WHAT THE CO-OP NEEDS TO DO FOR 2021/22

Re-examine the short-term financing undertaken by the Co-operative to support its asset base with a strong focus on tangible outcomes.

Urgency to spread out the duration and lengthen the degree of short-term financing

2

Check creditor listings and negotiate for longer-term financing

3

Check for any occurrence of default payments or delinquency in making payments to creditors

4

Determine whether the liability in the Co-Operative is short-term or long-term and what it is the cost to the Co-Operative, to maintain this level of debt in the business

5

Perform an analysis to determine whe her the existing level of debt, is threatening the on-going nature of the Co-Operative and assess to what expant its asset-liability management can be improved

6

Perform an analysis to determine whether the existing level of debt is threatening the on-going nature of the Co-Operative and assess to what extent its asset-liability management can be

7

Discuss with management on the potential for leveraged recapitalisation or deat restructuring in the business 8

Analyse whether the profitability growth experienced by the Co-Operative is sustainable, or whether it was more of a short term improvement

9

Examine to what extent price margins or debt acquisition was responsible for the increased level of profits

10

Determine whether the increased level of profitability growth was a result of a single client / contract

11

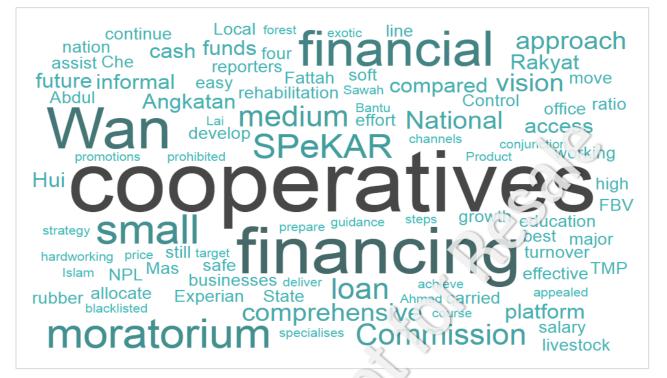

Check if the increase in costs is part of the Co-Operative's expansion plans; that corresponds to higher sales **12**

Check the size and validate its asset base and its functions

Page 4 ©ACE & MyFinB Group

EMERGING TRENDS: 2021 / 22

- 1. COOPERATIVES | Ensure that cooperative's businesses are running as usual. The focus now is improving the management of cooperatives. The main focus is to return the fees and shares of retired members as well as clearing external and bank debts apart from strengthening cooperative's financial position. Aside from that, it is important to enhance the confidence of the mambers for the cooperative.
- 2. FINANCING | Digitalisation in the lending space is expected to continue this year. Direct Lending levelages on technology to enable borrowers to have access to safe and affordable financing and to find, apply and receive financing that best suit them.
- 3. SPeKAR | Angkatan Koperasi Kebangsaan Malaysia Pho (ANGKASA) is targeting 100 per cent usage of its individual credit search system (SPeKAR) among credit cooperative members in the next two years. SPeKAR combines data ANGKASA salary on credit deductions, banks' information. litigation, bankruptcy status, blacklisted errant borrowers, as well as other credit information managed by Experian Information Information Services

- 4. MJRATORIUM | Cooperatives nationwide are offered a loan repayment moratorium through the Revolving Capital Fund (TMP-JPK) under the auspices of the Malaysian Cooperative Commission (SKM). The deferral repayment is offered for a period of six months, from April to next September, with an estimated total allocation cost of RM99 million.
- 5. COMMISSION | The Malaysian Cooperative Commission (SKM) aims to channel RM100 million in the Revolving Capital Fund (TMP) financing to the cooperative movement in Malaysia by 2021. Its Director of Financing and Credit Control Division, Rozdeen Mohd Jaafar said, the initiative can boost the post-Covid-19 Malaysian economic recovery process.
- **DEVELOP** | The Ministry of Entrepreneur Development and Cooperatives (Medac) will the Malaysian Cooperative Transformation Plan 2021-2025 (TransKoM), aimed to ensure entrepreneurship remains a major contributor in driving the country's economic growth. TransKoM outlines the comprehensive strategic goals and measures to ensure that the cooperative movement can provide greater benefits to wellbeing of members and establish community, well as as competitiveness and sustainability.

FINANCIAL SNAPSHOT

NO

Liabilitiesto-Equity 130.3%

Is the co-operative **profitable**?

YES

Profit Margin (after tax) 1.1%

Is the co-operative **growing**?

Sales Grow 1

FINANCIAL HEALTHCHECK

Good growth was recorded by the Co-operative, well-supported by a consistent demand for its products and services. Costs levels have generally increased for the Co-operative with corresponding increase in operational needs and activities. The cost of generating additional revenue was almost similar compared to the previous year. Highly limited profit margins were recorded by the Co-operative during the period. Growth had been fairly consistent year on year with a fairly moderate movement in profit margins.

Very high returns to stakeholders was achieved by the Co-operative during the period. There could be a high likelihood that the Co-operative's underlying valuation could improve as a result. Significantly high levels of exposure to liabilities, have likely contributed to an extremely weak solvency position indicating a high risk balance sheet profile for the period. The Co-operative's valuation is very likely to be adversely affected as a result. The Co-operative experienced strong profit growth compared to the previous year. Profit levels remained modest relative to sales. May not be adequately attractive for stakeholders who may demand for higher margins.

FINANCIAL RISK AREAS

Costs levels have generally increased for the Co-operative with corresponding increase in operational needs and activities.

55.0%

Business Performance

Sign, frantly high levels of exposure to liabilities, no e likely contributed to ar extremely weak solvency position indicating a high risk balance sheet profile for the period.

70.0%

Shareholders' Value

Very high exposure to short-term creditors/financing to support asset base extremely high frequency dealings to manage creditors to meet working capital orders.

16.7%

FINANCIAL IMPACT

Was the co-operative able to generate **higher sales**?

YES

Sales Growth

21.3%

This indicates where the cooperative's topline is growing or not and to find out if there are any structural or cyclical factors affecting it. Did **sales move faster** than cost growth?

YES

Cost Growth /Sales

-0.2%

This gives a broad picture if the costs are growing. Nine with the growth in sides or if the cooperative is exposed to higher cost structure even if the sales is growing.

Was the co-operative **financially strong** generally?

NO

Credit Score

48.8%

The credit score takes into account balance sheet and P&L of the co-operative. A higher score indicates a stronger credit position.

Was the **exposure to liabilities manageable?**

NO

Liabilities to Equity

3890.4%

This reflects the extent the cooperative is exposed to fixed obligations versus the capital it has built over the years and whether it has adequate buffer.

Was the co-operative relying heavily on short-term obligations?

NO

Current Liability Ratio

1.03

Assesse the proportion of total liabilities that are due in the near term. A secondary measure of liquidity as it does not measure the cooperative's ability to pay for the liabilities.

Were the **shareholders well rewarded** by the co-operative's performance?

YES

Return on Equity

49.51%

This measure relates to how much profits the co-operative is generating for the co-operative's shareholders; a higher ROE needs to be measured against the risks it is taking.

Were the **profit levels growing**?

YES

Pre-Tax Profit

48.3%

A co-operative that is showing consistent earnings growth indicates a positive outlook. A co-operative that shows negative growth may indicate tougher times ahead.

Were the **assets generating profits**?

YES

Return on Asset

1.2%

This is a measure of how well the co-operative is utilising its assets to generate profits for the co-operative. A productive asset backed by a cost-efficient operation is a good indicator of a well-rup co-operative.

KEY FINDINGS

FINANCIAL PERFORMANCE & OPERATIONS

LOW GROWTH

HIGH GROWTH

From a top-line growth standpoint, Koperasi Wawasan Rakyat Sabah Berhad registered higher revenues compared to the previous period. Its improved by 0.2% due to the surge in operational expenses. Total costs grew at a slower rate compared to sales, by 0.2%...

Good growth was recorded by the Co-operative, well-supported by a consistent demand for its products and services. Costs levels have generally increased for the Co-operative with corresponding increase in operational needs and activities. The cost of generating additional revenue was almost similar compared to the previous year. Highly limited profit margins were recorded by the Co-operative during the period. Growth had been fairly consistent year on year with a fairly moderate movement in profit margins.

STAKEHOLDER VALUE CREATION

LOW VALUE

HIGH VALUE

Koperasi Wawasan Rakyat Sabah Berhad posted ROE of 49.5% during the period, on the back of equity of \$31,526 (change of 98.0%) and profit of \$15,610 (change of 48.3%). Very high returns to stakeholders was achieved by the Co-operative during the period. There could be a high likelihood that the Co-operative's underlying valuation could improve as a result. Significantly high levels of exposure to liabilities, have likely contributed to an extremely weak solvency position indicating a high risk balance sheet profile for the period. The Co-operative's valuation is very likely to be adversely affected as a result. The Co-operative experienced strong profit growth compared to the previous year. Profit levels remained modest relative to sales. May not be adequately attractive for stakeholders who may demand for higher margins.

RISK LEVELS

HIGH RISK

LOW RISK

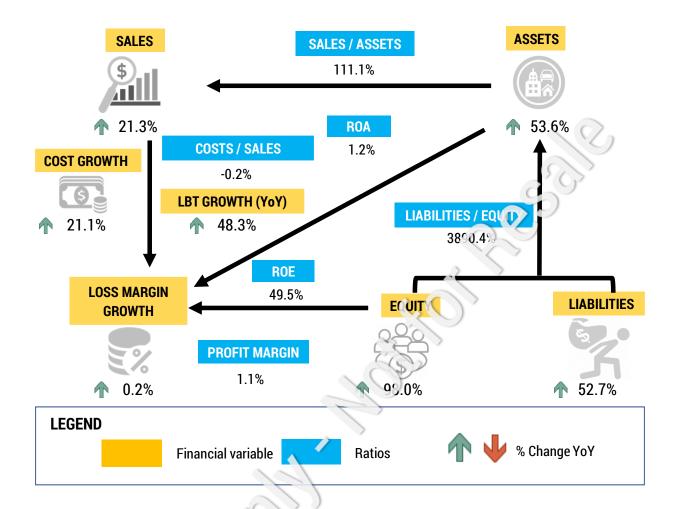

Total liabilities increased by 52.7% whilst equity increased by 98.0%. Consequently, debt to equity levels were alarming as equity was inadequate to cover debt obligations.

Very high exposure to short-term creditors/financing support asset base - extremely high frequency dealings to manage creditors to meet working capital orders. Extremely weak solvency position with very high exposure to liabilities high risk balance sheet profile for the period. Shareholder funds were highly inadequate to cover all of the cooperative's obligations. The co-operative registered a faster liability growth than its sales growth during the period. The drive for expansion appeared to be driven by aggressive gearing process, rather than margins and pricing management. The products and services of the co-operative continued to demonstrate consistent demand which resulted in good sales growth. Its pricing model and market strategies appeared to drive positive sales growth during the period.

Page 9 ©ACE & MyFinB Group

CAUSE-AND-EFFECT ANALYSIS

From a top-line growth standpoint, Koperasi Wawasan Rakyat Sabah Berhad registered higher revenues compared to the previous period. Its profits improved by 0.2% due to the surge in operational expenses. Total costs grew at a slower rate compared to sales, by 0.2%.

Revenue changes had been driven by the expansion of assets - Koperasi Wawasan Rakyat Sabah Berhad increased its asset base by 53.6% with recorded sales growth of 21.3%. In addition, ROA declined from 1.3% to 1.2% because of improvement in profits likely due to the increase in operational costs.

Total liabilities increased by 52.7% whilst equity increased by 98.0%. Consequently, debt to equity levels were alarming as equity was inadequate to cover debt obligations.

Koperasi Wawasan Rakyat Sabah Berhad posted ROE of 49.5% during the period, on the back of equity of \$31,526 (change of 98.0%) and profit of \$15,610 (change of 48.3%).

Negative News

Events that generated negative sentiments resulting in the Co-operative industry.

- 1. The Malaysian Cooperative Commission (SKM) has received complaints from the public that the Koperasi Samudra Malaysia Bernad co-operative has carried out denosit collection activities by offering high returns every month. This scheme did not get approval from SKM under Sections 50E and 52A of the Cooperatives Act 1993 where cooperatives are not allowed to take deposits and issue leans without the Commission's permission.
- Over 400 out of the 600 credit cooperatives
 nationwide that are registered under the
 Cooperative Commission of Malaysia (SKM) have
 been aftected by the COVID-19 pandemic since
 March. The cooperatives' incomes were affected
 during the six months as borrowers did not repay
 their instalments.
- Local credit cooperatives are accused of facing the risk of bankruptcy due to the restriction of personal loan repayments due to financial institutions and development financial institutions not providing moratorium services for that purpose.

Positive News

On the other hand, some events that had given positive sentiments to the Co-operative industry included:

- The Sabah Government Employees Cooperative Society Berhad (Kopeks) assures its members that the cooperative's businesses are running as usual with the main focus on returning the fees and shares of retired members as well as clearing external and bank debts.
- 2. The Ministry of Entrepreneur and Cooperative Development (MEDAC) will launch the Malaysian Cooperative Transformation Plan 2021-2025 (TransKoM), aimed to ensure entrepreneurship remains a major contributor in driving the country's economic growth.
- 3. Cooperatives nationwide are offered a loan repayment moratorium through the Revolving Capital Fund (TMP-JPK) under the auspices of the Malaysian Cooperative Commission (SKM). The deferral repayment is offered for a period of six months, from April to next September, with an estimated total allocation cost of RM99 million.
- 4. The local operations movement has suggested four solutions to make the People's Concerned Economic Stimulus Package (Prihatin) more effective and comprehensive by taking into account the welfare aspects of more than 14,417 cooperatives nationwide.

Page 13 ©ACE & MyFinB Group

STRATEGIC AUDIT AREAS

Check if the increase in costs is part of the Co-Operative's expansion plans; that corresponds to higher sales.

List down the variable and fixed costs in the last 24 months and evaluate the trends.

Distinguish between one-off and ongoing costs

ACTION STEPS

Compare the cost behaviour against sales and profitability performance.

Seek inputs if Management has formulated a business strategy to improve margins for subsequent years.

Ascertain if there are going to be any improvements to be made on the business model of the cooperative

Check if there are concentration of customer base within its revenue mix.

Check if there are limited product/service lines that may be less relevant for the changing demographics or settings.

SHAREHOLDERS

PHASE

PHASE

Determine whether the liability in the Co-Operative is shortterm or long-term and what it is the cost to the Co-Operative, to maintain this level of debt in the business.

Determine whether the main reason for profits growth was due to margins/sales management or leverage

Perform an analysis to determine whether the existing level of debt, is threatening the on-going nature of the Co-Operative and assess to what extent its asset-liability management can be

Ascertain the level of risks undertaken by the co-operative to generate the current/recent profit arowth.

improved.

Discuss with management on the potential for leveraged recapitalisation or debt restructuring in the business

Evaluate the sustainability of the erformance in bsequent years as this ay be a one-off streak.

Perform an analysis to determine whether the xisting level of debt is threatening the on-going nature of the Co-Operative d assess to what extent its asset-liability management can be improved.

Examine whether there are single major client or large contract that resulted in the strong performance.

Perform an analysis on the long-term debt in the business in terms of purpose, nature and financing costs.

Ascertain whether there are any possible mergers and acquisitions or nonorganic growth to maintain position.

Urgency to spread out the duration and lengthen the degree of short-term financing.

Check creditor list. and negotiate for longer-term financing.

Check for any occurrence of default payments or delinquency in making payments to creditors.

Check the size and validate its asset base and its functions

Evaluate existing relationships with creditors and check for existence of supplier concentration or related-party suppliers.

Determine whi products or multiple products contributed most to the increased levero sale

ssess the market place for products which may be used to replace the co-operative's good and service: determine to what extent that they can affect the momentum of the sales increase.

Rank the customers of the co-operative by contribution to sales and determine whether there were any significant changes or movements.

Perform a price analysis to determine whether there had been any price adjustments which resulted in higher volumes but lower prices.

Perform an assessment to determine whether lowering of margins were responsible for the increased sales growth.

PHASE 2

Examine to what extent price margins or debt acquisition was responsible for the increased level of profits

was the increase in profitability, generated by increased risks undertaken by the Co-Operative.

Assess to what extent

Find out what are the controls and measures being established to mitigate any risks associated with rapid expansion.

Analyse whether the profitability growth experienced by the Co-Operative is sustainable, or whether it was more of a short term improvement.

Check their rates of revenue and profitability arising from the rapid asset expansion trends experienced by cooperative.

Determine whether the increased level of profitability growth was a result of a single client / contract.

Identify whether the Co-Operative's dominant position, can be maintained through organic or non-organic means.

Gain insights on how the acquired assets formed part of the expansion plans of the co-operative.

Establish any volatility arising from assets by evaluating historical trends of asset levels both for fixed and current levels.

Evaluate whether the acquired assets are part of a horizontal or vertical types of expansion.
